The initial rate of assessment that shall be submitted for approval by referendum pursuant to this act is fifty-seven cents per thousand board feet. The initial assessment is not effective until approved by a majority of producers as required by this act.

HB 2038-S by House Committee on Agriculture & Ecology (originally sponsored by Representatives Linville and G. Chandler)

Clarifying "voluntarily fails" for water rights relinquishment purposes.

(DIGEST OF PROPOSED 1ST SUBSTITUTE)

Declares that, for the purposes of RCW 90.14.140 through 90.14.180, unless the context clearly requires otherwise, "voluntarily fails" means the nonuse of all or a portion of the water by the owner of the water right, where the nonuse occurs as a result of factors within the control of the water user.

Declares that a failure to use all or a portion of a water right for irrigation use is involuntary when the water needed for irrigation use under the right is reduced as a result of: (1) Varying weather conditions including but not limited to precipitation and temperature, so long as the water user's diversion and delivery facilities are maintained in good operating condition consistent with the beneficial use of the full amount of the water right. The burden is on the water user to prove that the weather conditions are significantly different from average conditions such that they resulted in the reduction of water use;

(2) The temporary presence of return flows used in lieu of water from the primary source of water supply under the right if the return flows are measured or reliably estimated using a scientific methodology accepted as reliable by the director of the department of ecology; or

(3) Crop rotation.

Declares that, if the landowner accepts the offer for qualifying timber for which an approved forest practices application for timber harvest cannot be obtained because of restrictions under the forest practices rules, the department of natural resources shall pay the compensation promptly upon: (1) Verification that there has been compliance with the rules requiring leave trees in the easement area; and

(2) Execution and delivery of the easement to the department of natural resources.

Provides that owners who qualify for compliance with the streamside buffers described in this act may instead choose to comply with rules adopted to implement the forest and fish report under chapter 76.09 RCW. HB 2162-S by House Committee on Natural Resources (originally sponsored by Representatives Murray and Erickson)

Proposing to study state-owned water dependent lease rates.

(DIGEST OF PROPOSED 1ST SUBSTITUTE)

Finds that the current method for determining water-dependent rental rates for aquatic land leases for marinas may not be achieving the management goals in RCW 79.90.455. The current method for setting rental rates for marinas, as well as alternatives to the current methods, should be evaluated in light of achieving management goals for aquatic lands leases.

Finds that in order to prepare a complete and comprehensive report on this subject, the department of natural resources must be provided with complete income and expense information.

Finds that rent increases for marinas should be limited to twenty-five percent of what the increase for each marina would otherwise have been under RCW 79.90.480, until June 30, 2002.

Directs the department of natural resources to study and prepare a report to the legislature on alternatives to the current method for determination of water-dependent rent for marina lessees, as set forth in RCW 79.90.480.
